

POSNAcademy Peer Review Form - Technique Video (Operative or Non-operative)

Submission Info					
	Abstract Number				
	Title				
	Video Link				
General Information		Y/N		Comments	
	Title Slide				
	Complete Author Listing				
	Relevant Disclosures (Must Appear at Beginning of Program)				
	Is any commercial support listed in the form of a video credit rather than advertising?				
	Is any off-label use adequately disclosed?				
	Are any propriety/trade names used instead of generic product names?				
	Copyright Permission (drawings, illustrations, other video footage) attributed in closing credits for video?				
	Copyright Permission (drawings, illustrations, other video footage) attributed with the image for stationary pictures and slides?				
	Patient privacy: no identifying information (name, initials, hospital numbers) including Xrays and MRIs?				
	Patient Consent Attestation (written consent for full surgical technique videos)				
Categorization		Mark Best Category		Identify Subcategory	
	Anatomic Disorder (Upper Extremity, Hip & Pelvis, Lower Extremity, Foot & Ankle)				
	Systemic Disorder (Bone Disorder, Cerebral Palsy, Myelomeningocele, Syndromes)				
	Infection & Tumor (Infection, Benign Tumor, Malignant Tumor)				
	Spine (Congenital, Early Onset, Kyphosis, Scoliosis, Trauma)				
	Sports (General, Elbow & Wrist, Shoulder, Hip, Knee, Ankle)				
	Trauma (Upper Extremity, Hip & Pelvis, Lower Extremity, Foot & Ankle)				
	Clinical Skills				
	OSVI				
Keywords		Y/N		Additional Keywords	
	Are the keywords adequate? Suggest additional keywords				
		Excellent		Good	
		Unacceptable		Comments	
General	Is the visualization appropriate (from the surgeon's point of view)?				
	Lighting: Is the surgical field adequately visualized?				
	Is the narration clear?				
	Audio Quality / Level				
Context	Comments				
	Introduction				
	Patient Selection				
	Indications / Contraindications (overall and for the illustrative case)				
Operating Theater	Etiology of the Pathologic Condition / Mechanism of Injury				
	Preoperative Images				
	Description of preoperative evaluation and prep planning				
	Room Setup				
Technique	Patient Positioning				
	Anesthesia				
	Instrumentation and Implants				
	Surface Anatomy / Landmarks				
	Exposure				
	Structures at Risk				
	Orientation / Reorientation				
	Arthroscopic Picture in Picture				
	Fluoroscopic Images / Navigation				
	Intraoperative Options Identified and Described				
	Rationale				
	Fixation Techniques and Options				
Results	Is the procedure a standard procedure or are there significant personal variations that may not be appropriate?				
	Are all the operative steps clearly demonstrated in an illustrative real patient (not just a cadaver)?				
	Are universal precautions taken? (Personal protective equipment: eyewear, etc.)				
	Postoperative Images				
Complications	Postoperative Care				
	Rehabilitation Protocol				
	Adequate follow-up of illustrated case? (Clinical, clinical photos, video, xrays, etc.)				
	Outcomes (Literature, Author's Personal Series, etc.)				
Conclusion	Discussion of potential complications and pearls to avoid complications				
	Does the author conclude with operative pearls and outcomes of the technique/procedure and are those outcomes published in peer-reviewed literature?				
	References				
	Appropriate references included?				
Special Effects	Animation				
	Music				
	Illustration				
Editing Notes		Comments			
	Content (ex. Cut wrong info, extract the best info at 3:59-5:22 to stand-alone video)				
	Format (ex. add summary/intro or remove empty time)				
	If the video is longer than 10:00, please include suggestions for editing it down.				
	Any additional comments?				
Specific Edits		Specific Recommendation			
	Time Start / Time Stop				
Recommendations		Y/N		Comments	
	Do you think the video will enhance the educational content of POSNAcademy?				
	1. Acceptance without Need for Revision (Y/N)				
	2. Conditional Acceptance (Y/N) - Detail conditions for acceptance				
	3. Rejection (Y/N) - Detail reasons for rejection
